Introduction

The following document is a comprehensive bibliography of published and unpublished works written in the framework of Lexical Functional Grammar. The first version of this bibliography was compiled by Mary Dalrymple at Xerox Palo Alto Research Center (PARC), with assistance from Joan Bresnan and Trudy Vizmanos of the Center for the Study of Language and Information (CSLI), Stanford University. Peter Austin and Mary Dalrymple subsequently worked together on expanding and checking the bibliography and producing it in its present form, and its maintenance has just been taken over by Avery Andrews. Many contributors to the electronic bulletin board LFG-list assisted with correcting and adding references. We thank them all for their diligence.
